

eSight and Urjanet Partner for a Unique and Complete Energy Data Management Solution

Urjanet and eSight Energy partner to provide an end-to-end energy management solution. Urjanet Utility Data Service helps to eliminate the burden of utility data access, aggregation, and entry by providing a feed of your utility data directly into eSight software. eSight Energy and Urjanet allow you to gain a more accurate understanding of your energy consumption, resulting in better, more informed decisions for your business.

HOW DOES IT WORK?

Urjanet's technology obtains your utility bill and interval data and automatically delivers it into your eSight software application. Urjanet Utility Data Service and Interval Data Service provide data that is obtained directly from over 3,000 utility providers with automated processing. These cost-effective automation tools help you to reduce manual data collection as much as possible. Your data is guaranteed to be complete, accurate, and timely.

COLLECT

Urjanet acquires your organization's data from various sources and from a variety of distinct electronic data formats. The robust data extraction engine pulls each and every data point available, so your data set is rich and complete.

PROCESS

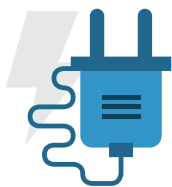

Urjanet's transformation engine translates your data from numerous sources and formats into to one streamlined, standardized data stream.

DELIVER

Urjanet allows for seamless data delivery into eSight's software application, ready for reporting and analysis.

BENEFITS OF AN ESIGHT & URJANET SOLUTION INCLUDE:

A complete and accurate **view of energy consumption**

Time savings from automating data collection and shifting time away from manual data entry

Increasing the **productivity and effectiveness** of your team to focus on more strategic projects

ESIGHT SOFTWARE SUPPORTS THE FOLLOWING URJANET PRODUCTS:

UTILITY DATA SERVICE

Automated collection and delivery of multi-site utility bill data for electricity, natural gas, water, and waste

INTERVAL DATA SERVICE

Consumption interval data from utility-deployed smart meters without the hassle of installing expensive sub-meters or additional hardware

ABOUT URJANET AND ESIGHT

Urjanet's mission is to provide the world with easy access to automated utility data. Our cloud-based platform connects directly to utilities to seamlessly acquire and normalize disparate utility bill and interval data. The processed data is delivered directly to industry-leading business applications. Our products allow our customers to accurately report and track energy spend and consumption, reduce costs, and increase operational efficiency across the organization.

The eSight Energy management platform allows organizations to reduce energy consumption, cut costs, and lower carbon emissions. Comprehensive and intuitive, eSight is an enterprise wide solution for managing energy across the organization of any size or sector. eSight has helped companies globally save significantly on energy costs.
